

## Mumbai Intl. Airport -3 New metro stations

The new Mumbai Metro Line 3 will provide public transport access to Chhatrapati Shivaji International Airport (CSIA) for which three metro stations will be constructed. The underground stations will be complemented by car park facilities as well as complex over site developments with shopping centers, hotels and office blocks. The stations are located at Domestic Terminal, International Terminal and Sahar Road - future airport city.

### Services:

- Review of station design requirements, functions, processes and existing concepts
- Development of station layout options for each station with optimized passenger flows and space efficiency
- Preliminary design development of preferred station layout(s) incl. site plans with station entrances, curbsides, car park access and connections to surrounding areas
- Coordination of structural and MEP engineering.

Period of Services:  
2014
